

Adobe Investor Meeting

October 10, 2023

The background is a vibrant, abstract composition. A large green shape dominates the left and center. To the right, there are large, flowing, organic shapes in shades of orange and red. In the bottom right, there are more angular, layered shapes in red and purple. A black and white checkered pattern is visible in the upper right, and a blue and orange checkered pattern is in the bottom left.

Welcome

Jonathan Vaas | VP, Investor Relations

Safe harbor statement and disclaimers

In addition to historical information, this presentation and accompanying oral commentary (the “Materials”) contains “forward-looking statements” within the meaning of applicable securities law, including statements related to our product development plans and new or enhanced offerings; our business, artificial intelligence (“AI”) and innovation momentum; our vision for the digital world, innovation and AI, including the expected benefits for us; our market opportunity and future growth; market and AI trends; strategic investments; revenue, operating margin, operating efficiencies and annualized recurring revenue; industry positioning; and customer acquisition and retention. In addition, when used in the Materials, the words “will,” “expects,” “could,” “would,” “may,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “targets,” “estimates,” “looks for,” “looks to,” “continues” and similar expressions, as well as statements regarding our focus for the future, are generally intended to identify forward-looking statements. Each of the forward-looking statements we make in the Materials involves risks, uncertainties and assumptions based on information available to us as of the date of this presentation. Such risks and uncertainties, many of which relate to matters beyond our control, could cause actual results to differ materially from these forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to: failure to compete or innovate effectively; failure to develop, acquire, market and offer products and services that meet customer requirements; introduction of new technology and rapid technological changes; changes in information security and privacy regulations; potential interruptions or delays in hosted services provided by us or third parties; geopolitical and macroeconomic conditions; risks associated with cyber-attacks; complex sales cycles; risks related to the timing of revenue recognition from our subscription offerings; fluctuations in subscription renewal rates; failure to realize the anticipated benefits of past or future acquisitions or to complete announced acquisitions; failure to effectively manage critical strategic third-party business relationships; changes in accounting principles and tax regulations; uncertainty in the financial markets and economic conditions in the countries where we operate; risks associated with being a multinational corporation; and those factors discussed in the section titled “Risk Factors” in Adobe’s Annual Report on Form 10-K and Adobe’s Quarterly Reports on Form 10-Q. The risks described in the Materials and in Adobe’s filings with the U.S. Securities and Exchange Commission should be carefully reviewed. Undue reliance should not be placed on these forward-looking statements, which speak only as of the date of the Materials. Adobe undertakes no obligation, and does not intend, to update the forward-looking statements, except as required by law.

During the accompanying oral commentary, we will discuss non-GAAP financial measures. The GAAP financial measures that correspond to non-GAAP financial measures, as well as the reconciliation between the two, are available on www.adobe.com/ADBE.

The Materials also contain statistical data, estimates and forecasts that are based on independent, third-party industry publications or other publicly available information, as well as other information based on Adobe’s internal sources. This information may be based on many assumptions and limitations, and you are cautioned not to give undue weight to such information. Adobe has not independently verified the accuracy or completeness of the data contained in the industry publications and other publicly available information, and usage of such information does not mean or imply Adobe has adopted such information.

The information in the Materials on new or future products, capabilities, offerings or functionality (the “Availability”) is intended to outline our general product direction and should not be relied upon in making a purchasing decision. The Availability is for informational purposes only and shall not be incorporated into any contract. The Availability is not a commitment, promise, or legal obligation to deliver any future products, capabilities, offerings or functionalities. The development, release, and timing of any of the Availability described in the Materials remain at our sole discretion and may differ from what is presented in the Materials. Additional fees may be charged for any products, capabilities, offerings and/or functionality.

Q&A

The background is a vibrant, abstract composition of various colors and shapes. It features a large purple shape on the left, a green shape at the top right, and a red shape at the bottom right. There are also several blue and orange shapes, including a large blue circle in the foreground. The overall style is modern and artistic, with a focus on bold colors and geometric forms.

The AI opportunity for Adobe: raise the ceiling & lower the floor

Raise the ceiling

Lower the floor

More value: personalized digital experiences

- Create and power more content across media types
- Enable agile experience creation and scaled production
- Deliver hyper-personalization at scale

More users: bring billions into the fold

- Meet users where they are in Adobe apps, enterprise workflows and partner ecosystem
- Streamline onboarding and accelerate time-to-success
- Empower new stakeholders across creativity, documents and digital experiences

Imagine the future

Individual artists will transcend the boundaries between media types and create unprecedented experiences

Personal AI agents will augment how we work and learn

Creators will have new opportunities to monetize their vision, style and content

Brands will offer 1:1 luxury experiences to everybody

Businesses of all sizes will reach, engage and serve customers with previously unimaginable quality

Experiences will be generated in real time for each of us

Rich, immersive experiences will be the norm – transforming commerce and entertainment as we know them

What to expect in Experience Cloud: delivering the future of digital experiences

The collage illustrates various capabilities of Adobe Experience Cloud:

- Solo Travel insights:** A dashboard showing "Shifting preference to solo travel" with a bar chart indicating 25% of Americans plan to travel solo in 2023. It also includes a pie chart for "Nights Booked by Solo Travelers" (2021: 26%, 2022: 31%, 2023 Q3: 40%) and a donut chart for "Leisure travel bookings by generation" showing 110k bookings.
- AI Assistant:** A chat interface asking "Would you like to learn more about customizing charts in Adobe Experience Cloud?" with options to "Show sources" and "Add breakdown by generation".
- Generative AI Tools:** Includes "Enhance Copy" (Summarize, Elaborate, Simplify, Rewrite, Change tone) and "Text to image" (Prompt: "A steep mountain slope with powder."; Results: "Ultimate snow boots" image).
- Assets:** A library of digital assets like a backpack and snow boots.
- Workfront:** Project management interface showing "19.9 Available 15 Required" resources and a "\$1.1M Budget".
- Channel preferences:** A settings panel for "E-mail", "Web", and "Instagram".

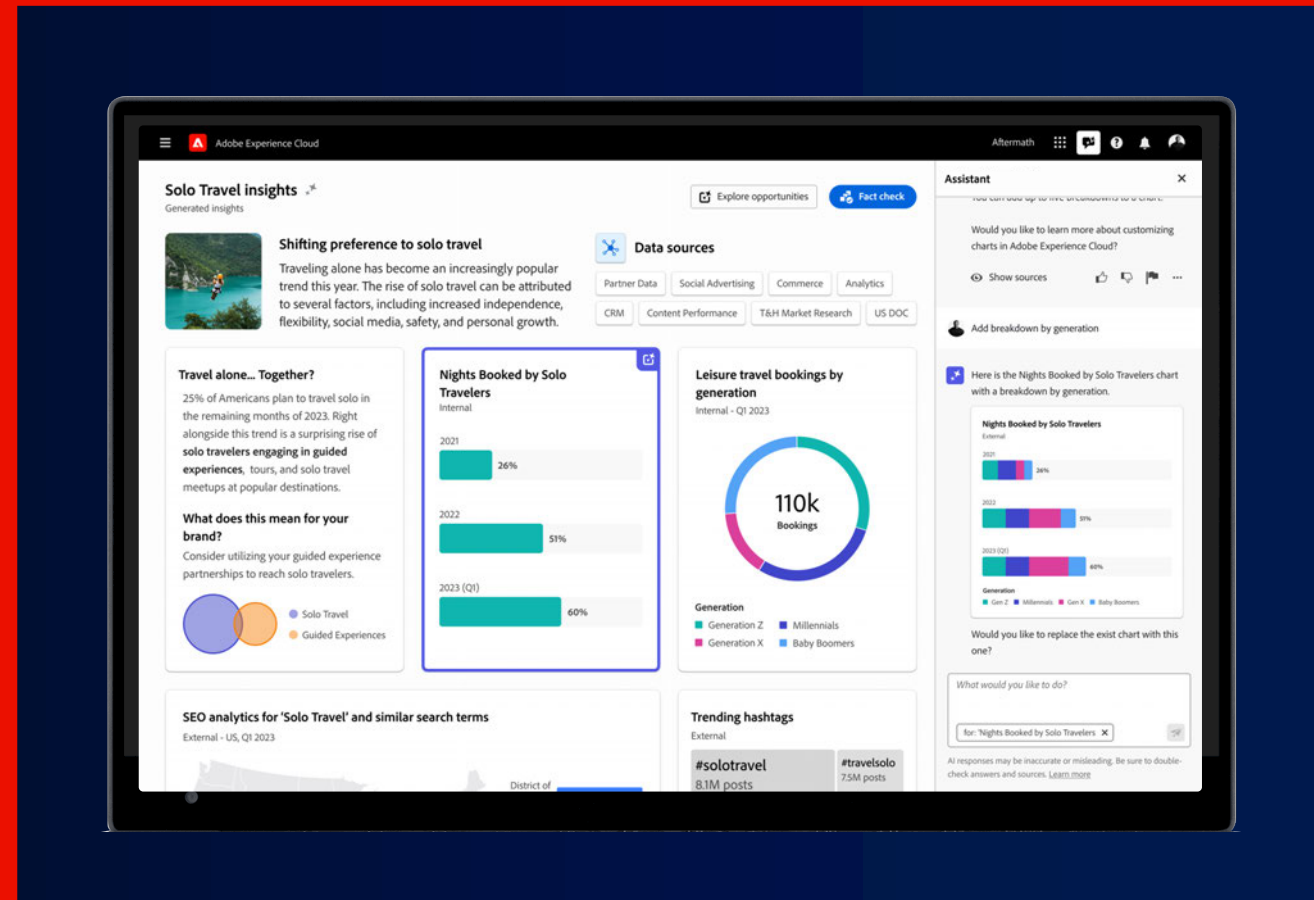

AI Assistant enhancing productivity across Experience Cloud apps

Reimagining Experience Cloud apps leveraging generative AI

New generative AI-based solutions to revolutionize digital experiences

AI Assistant across Experience Cloud apps

Conversational interface natively embedded in workflows across Experience Cloud apps

→ Contextual assistance

Enable users across enterprise to receive accurate and brand-safe answers through conversational agent

→ Insights generated by AI

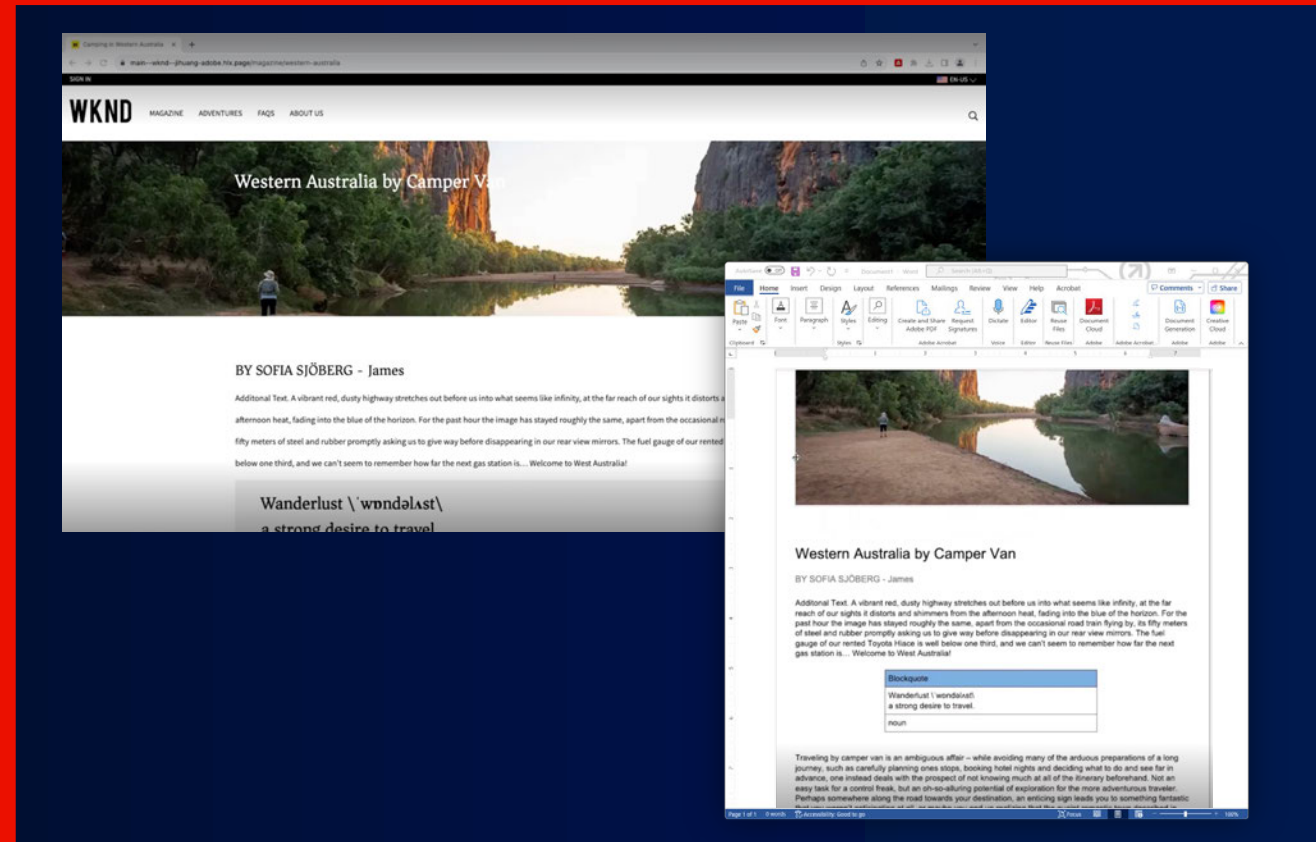

Automatically generate natural-language insights powered by analysis of events, trends and user behavior

→ Automated workflow and tasks

Automate manual, cumbersome tasks and enable users to focus on higher-value activities

Reimagined Adobe Experience Manager

Revolutionary new product to build, author and deliver content to every device at the speed of digital business and with transformative generative AI capabilities

→ Edge delivery services

Deliver fastest possible page load times, and maximize SEO, lighthouse scores and conversion through composable services

→ Document-based authoring

Empower users to create, edit and publish content with familiar tools like Microsoft Word

→ Content optimization

Optimize site design and performance with generative AI and embedded testing

→ Developer tools

Build sites and launch features quickly with pre-optimized code and well-known JavaScript and CSS frameworks

Adobe GenStudio

Supercharging the content supply chain with the power of generative AI

Ideation/brief

Creation

Collaboration and reviews

Production

Deployment

Measurement and optimization

→ Content creation and production

Empower creative teams with central content hub and generative AI-powered ideation, creation and automation of derivative assets

→ Workflow and collaboration

Simplify collaboration across marketing and creative teams and enhance visibility into capacity, projects, risks and timelines

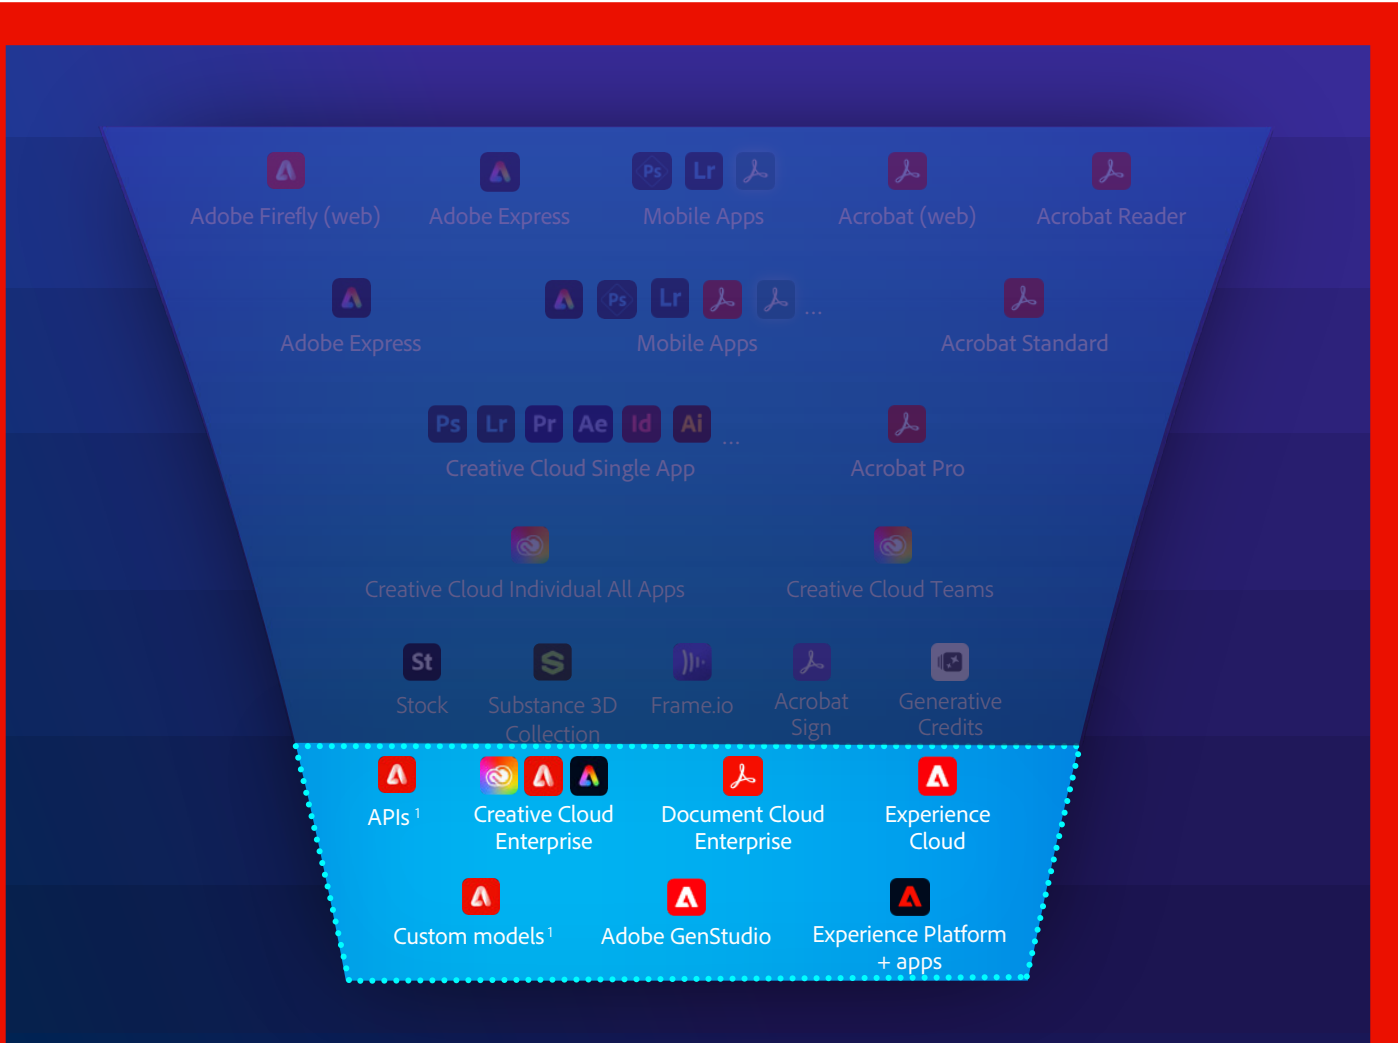

→ Delivery and activation

Streamline activation through native integration of content hub with Experience Cloud and third-party partner applications

→ Analytics and reporting

Measure performance of content for specific audiences from experience to asset and individual content attribute levels

Enterprise go-to-market for Adobe GenStudio

- C-level (CEO, CMO, CDO) interest in Adobe's vision for generative AI
- Viral adoption of Adobe Firefly and Adobe Express by knowledge workers in enterprises
- Accelerated deployment and time-to-value
- Brand-specific customization
- Strategic partnerships with major system integrators and agencies

The AI opportunity for Experience Cloud

Transformational value

Empowering new practitioners

Accelerate business value

- Simplify content creation-to-activation process
- Drive efficiency through embedded generative AI offerings and automated workflows
- Shorten time to plan and deploy new use cases

Expand enterprise user base

- Enable any user to rapidly become proficient through conversational interfaces
- Expand beyond marketing to include new functional areas
- Democratize insights across the enterprise

AI innovation drives new monetization opportunities

AI Assistant enhancing productivity across Experience Cloud apps

- Drive upsell through availability in Prime and Ultimate tiers
- Create incremental adoption opportunities through seat expansion

Reimagining Experience Cloud apps leveraging generative AI

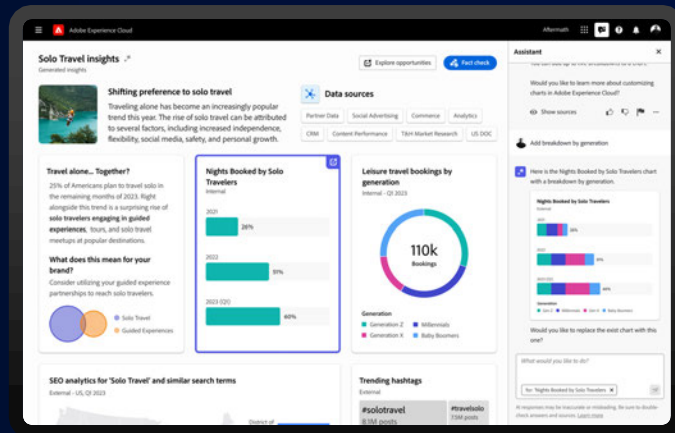

- Deliver added value for new and renewing customers
- Enable list price uplift

New generative AI-based solutions to revolutionize digital experiences

- Offer scaled pricing based on number of seats and usage

AI and data: growing global regulatory implications

AI and data: growing global regulatory implications

Adobe's responsible AI focus areas

AI acceleration driving regulatory focus on:

Harmful bias/discrimination

Creator and brand protection

Misinformation

Without proper guardrails, AI models can learn from biases inherent in training data.

Adobe's approach

Rigorous AI Ethics review process with continuous testing, training and feedback enables Adobe to mitigate harmful, unsafe, biased outputs in our models.

doctor in a lab coat with a stethoscope

Clear style

Generate

Results from Adobe Firefly

AI acceleration driving regulatory focus on:

Harmful bias/discrimination

Creator and brand protection

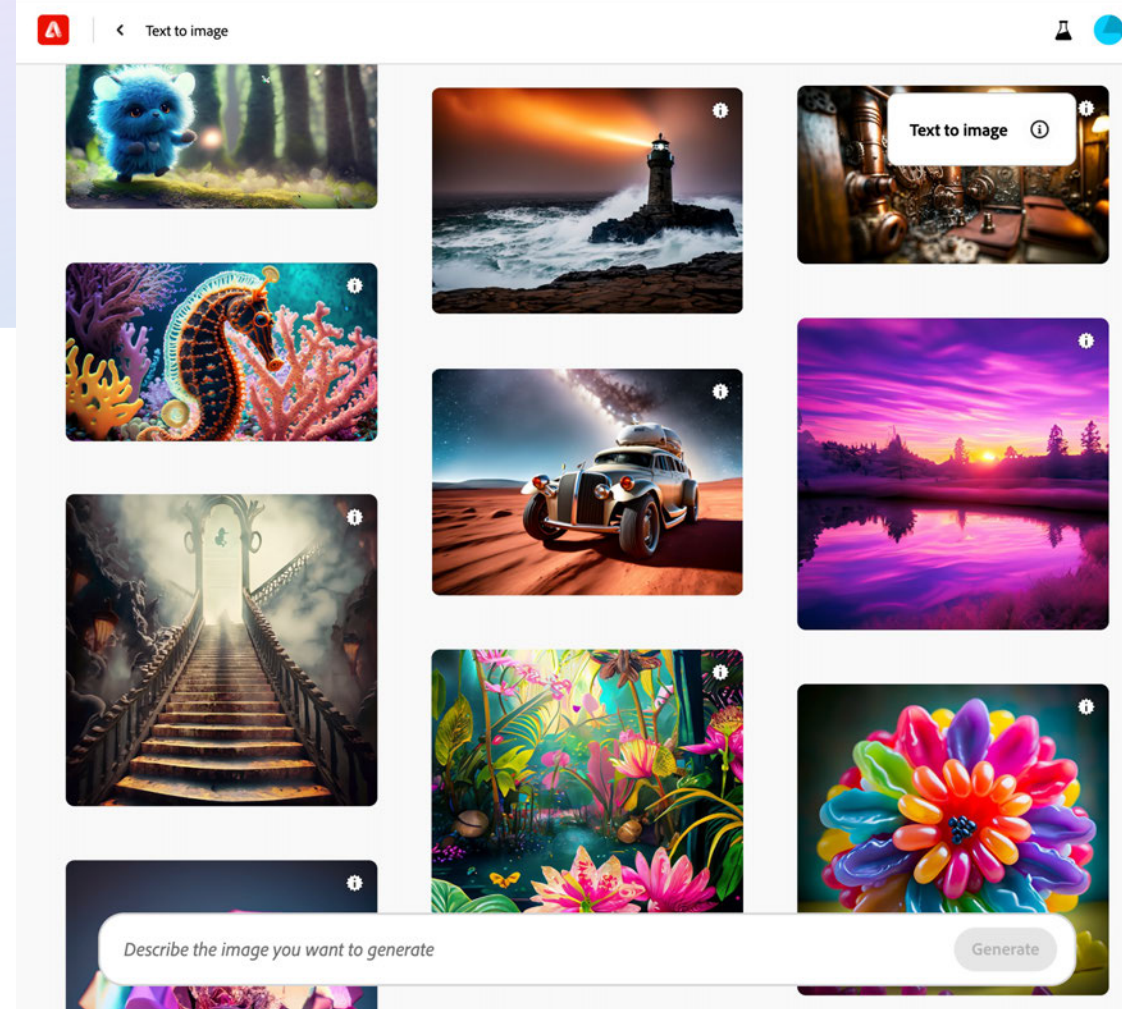

Misinformation

Creators have concerns about AI training on their work, brands are concerned that using AI will cause them to infringe someone's intellectual property.

Adobe's approach

Designed to be commercially safe by training on licensed content, building in content moderation, and providing industry-leading indemnification.

FAIR Act: Adobe proposed new legislation to let creators enforce rights against those who intentionally impersonate their style.

AI acceleration driving regulatory focus on:

Harmful bias/discrimination

Creator and brand protection

Misinformation

Bad actors can misuse AI to generate realistic synthetic content designed to deceive.

Adobe's approach

Founded the **Content Authenticity Initiative**, a cross-industry coalition of **~2,000 members**¹ including chipmakers, camera manufacturers, software and AI developers, media organizations.

Developed **Content Credentials**, a **standards-based** technology that acts as a nutrition label for digital content.

 AI-generated asset

Adobe GenStudio: responsible innovation in action

- **Investment in developing foundation models** from the ground up enables Adobe to design our AI to be **commercially safe**
- **AI Ethics testing and content moderation**
- **Indemnification** for generative AI content
- **Privacy and Security data governance**

Responsible innovation matters

FORRESTER

“Firefly is designed for open commercial use – unlike other generative AI systems for images such as DALL-E 2, whose output was groundbreaking but is legally dicey for any organization to use publicly.”

OMDIA

“Adobe behaves like an adult when other companies generate images in a somewhat irresponsible way.”

FORTUNE

“Adobe expands call for law to fight AI impersonation.”

FASTCOMPANY

The other part of the unique proposition that Adobe brings to the AI wars is the Content Authenticity Initiative....this is a good step forward that will protect users of these technologies, human content creators, and society as a whole, whose very existence is threatened by the proliferation of credible fake content and its potential use by bad actors.

The New York Times

“The good news is that Adobe, the company that makes Photoshop, has considered the dangers and has been working on a plan to address the widespread dissemination of digitally manipulated pics. The company has created what it describes as a “nutrition label” that can be embedded in image files to document how a picture was altered, including if it has elements generated by artificial intelligence.”

Innovation at Adobe

Gloria Chen | Chief People Officer &
EVP, Employee Experience

Our Company Values

Let's **Adobe** together.

Create the future.

Creativity is in our DNA. We constantly look around the corner to see what is possible. But we don't wait for the future, we create it.

We are builders, makers, and inventors, driven by a deep empathy for our customers and users.

We are open-minded and celebrate new ideas. We have the courage to disrupt the market and ourselves through bold bets and ideas we turn into reality.

Own the outcome.

We think and operate like owners. We take initiative, have a bias toward action, and assume ownership for end results, not just our part.

We are reliable and have clear points of view. We're decisive and learn from our mistakes.

Raise the bar.

We aim high and we play to win. We relentlessly focus on execution, celebrate excellence and are intellectually honest about where we must do better.

We deliver both speed and quality by doing fewer things better. Our success is measured by the success of our customers and users.

Be genuine.

The ability to be yourself is core to who we are. We embrace and respect diversity.

We support and challenge each other by being honest and direct. We always act with sincerity, integrity and the highest of ethics.

We do this for our employees, partners, customers and communities.

AI @ Adobe approach

Rethink work & what is possible with generative AI

- **Cross-functional** working group
- Encouraging and enabling **responsible grassroots experimentation**
- Building **AI literacy** and sharing learnings broadly
- Maximizing the use of **Adobe @ Adobe**
- Deploying **micro innovations** and **high-impact solutions**

Innovating across the enterprise with AI

The collage features a central image of a woman in a blue blazer holding a tablet. Surrounding her are various AI-powered interfaces and data visualizations:

- Product Innovation:** A design tool interface with a 'Design' tab, a 'Prototyping' tool, and a 'JSON' data viewer showing document structure.
- Customer Experience:** A 'Text to image' interface showing a prompt 'A steep mountain slope with powder.' and generated images. Below it, a 'Channel preferences' menu lists 'Direct mail', 'Phone', and 'Facebook'. A chatbot interface from 'LUMA' asks 'Hey Mia! Are you still interested in sneakers?' and 'Yes, what other colors are available?' with a color selection tool.
- Operational Excellence:** A dashboard showing 'Likelihood for users to open an' with a bar chart, a 'Scoring summary' with a '94017k' gauge, and a 'Summarization' tool with a 'Target (words)' input set to 200.
- Employee Experience and Productivity:** A calendar interface with a yellow header 'OBER' and a grid for 'S M T W T F S'. Below the calendar are three callout boxes with star icons: '- Here's a summary.', '- Send this to your team for feedback.', and '- Adding data visualizations could make this more engaging – should I show you a few options?'.

The diagram shows a central figure of a person in a yellow shirt, surrounded by various business functions impacted by AI. The functions are represented by colorful icons and labels: 'Customer interfacing' (a person in a yellow shirt), 'Development & data' (a person in a blue shirt), 'HR & technology' (a person in a blue shirt), 'Cybersecurity' (a person in a blue shirt), and 'Legal & privacy' (a person in a blue shirt). The background is a mix of red and blue, with a central figure of a person in a yellow shirt.

Investments in cloud services drive customer value, engagement, differentiation and scale

Creative Cloud

Document Cloud

Experience Cloud

40%

More Photoshop usage when cloud services are utilized¹

>75%

Increase in Acrobat Web MAU Y/Y²

~17 trillion

First-party segment evaluations per day³

25%

Less churn among Creative Cloud customers using Adobe tools on multiple surfaces⁴

~5x

Acrobat Web conversion rate, as compared to desktop funnel⁵

<100ms

Response time for 99.5% of requests⁶

Adobe's Unique Growth Recipe

Monetizing our innovations – Adobe’s growth algorithm

Creative Cloud

Document Cloud

Experience Cloud

New user growth

- Freemium funnels driving broad adoption and engagement
- Expanding in web and mobile
- Innovating in more media types

- Freemium funnel - Reader and Web
- Distribution partnerships
- Generative AI-powered capabilities

- Extending value of AEP + native apps to broader customer base
- Serve new practitioners in the enterprise with Product Analytics and Mix Modeler
- Drive value, insights and retention with embedded AI Assistants¹

Cross-sell & upsell

- Services adoption and collaboration
- Upsell to higher value offerings
- Seat expansion with Express
- New offerings including APIs and custom models¹

- Share and Sign adoption
- Conversational experience
- Seat expansion in businesses
- New offerings including AI Assistant and APIs¹

- Transformational deals to deliver personalization at scale
- Adoption of AI Assistant through Prime and Ultimate tiers¹
- Enhanced cross-cloud opportunities, including GenStudio

Value-based pricing & Generative Credits

Adobe's DDOM journey over the last decade

⁵ Adobe, May to August 2023

Digital Media: driving the top-line with DDOM and PLG

Subscribers

Traffic, new user IDs and a successful PLG motion in freemium offerings drive paid subscriptions

Retention

Generative AI benefits throughout the product portfolio drive increased engagement—improving retention

ARR

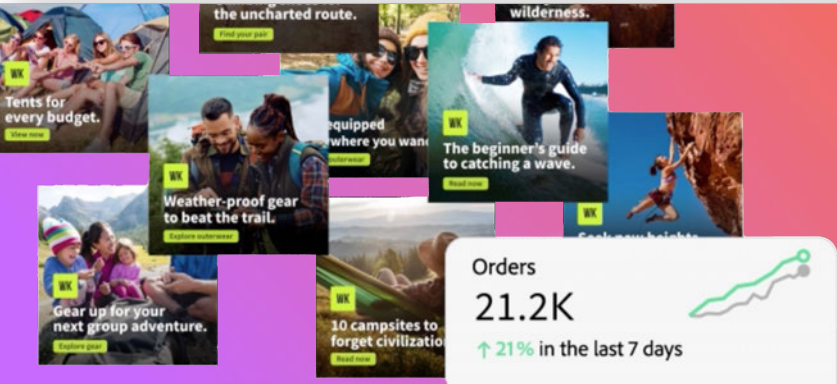

Strong demand, deeper engagement, improved retention and upsell journeys drive ARR growth at scale

Digital Experience: driving the top-line with personalization at scale

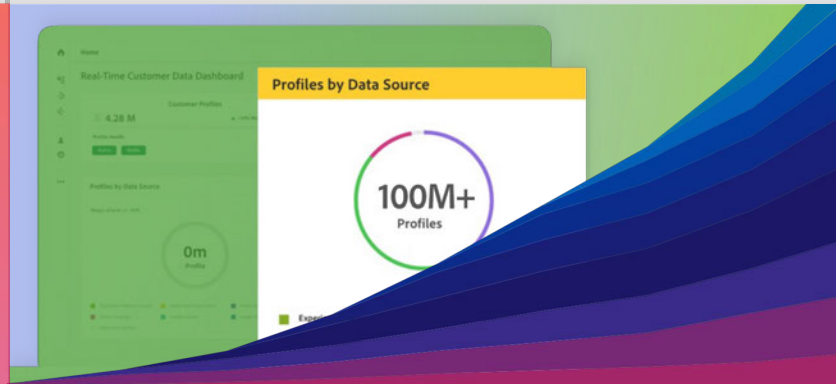

New logos

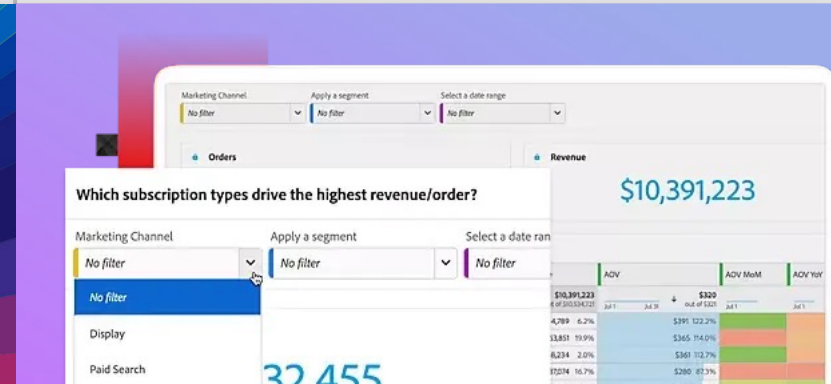

Solution selling to onboard new customers across content and commerce, data insights and audiences, customer journeys, and marketing planning and workflow

Expansion & transformation

Real-time customer data platform and integrated offering enabling multi-solution adoption and transformational outcomes

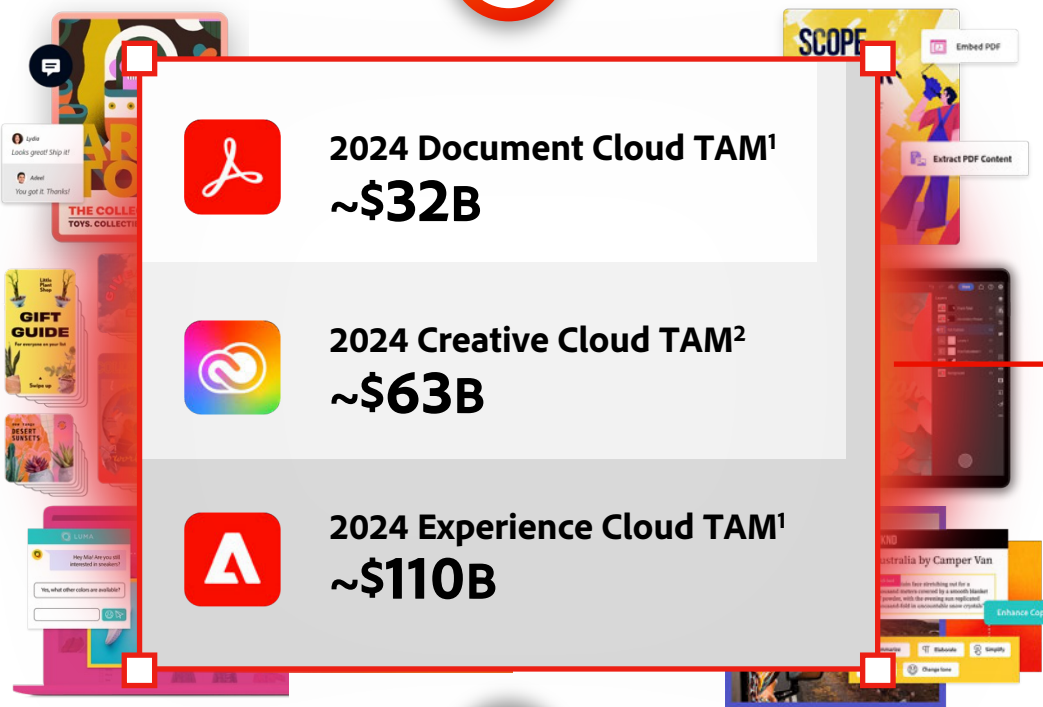

Subscription revenue

Driving subscription revenue growth at scale by enabling enterprises to simultaneously increase their top-line growth and improve ROI

Expanding Adobe's opportunity: the path to \$30B and beyond

Raise the ceiling

Lower the floor

More value: transform digital experiences

- New tools, APIs, models and workflows—integrated across Adobe's clouds—to deliver higher-quality, personalized digital experiences more efficiently
- New offerings, including Firefly, GenStudio, Product Analytics, and an omni-channel platform, to drive customer acquisition, expansion and retention
- Unique monetization opportunity that scales with usage, intensity and value

More users: bring billions into the fold

- Breadth of Digital Media offerings meeting customers where they are across unparalleled product footprint and distribution network
- Empowering new stakeholders across businesses of all sizes with Express, Acrobat and GenStudio
- Increased accessibility to experience creation and delivery platforms for new practitioners in the enterprise
