

Adobe PDF Print Engine

The rendering platform for the Adobe PDF print experience

Advanced
color capabilities

Performant and
robust architecture

Industry-leading
print quality

Dynamic workflow
capabilities

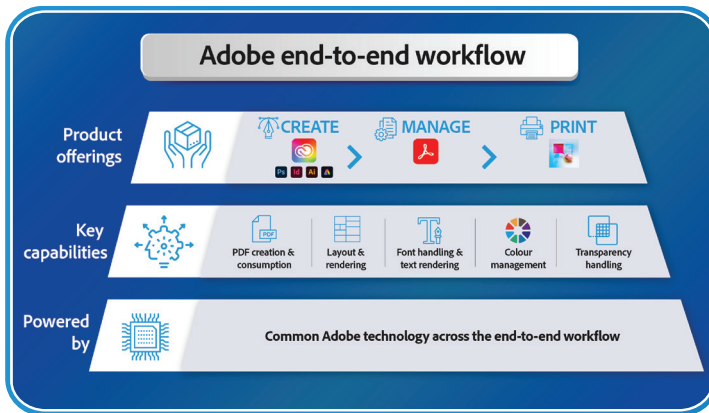

No surprises in your commercial print jobs!

Adobe PDF Print Engine brings the latest advances in imaging science to Print Service Providers (PSPs) and their customers – the job owners and the designers of the world. PSPs must support their operations with the most advanced technologies to navigate a rapidly changing and highly competitive business environment. When Adobe PDF Print Engine renders jobs, the results will delight your current customers, win new customers, and grow your bottom line. The PDF Print Engine prevents unwanted surprises because it has been built on the same foundational software as Adobe Illustrator, InDesign, Photoshop, and Adobe Express. But, regardless of the authoring application, when ink hits paper, the result will match what you and your customers see displayed on-screen in Acrobat. PDF Print Engine is architected to automate production, shorten prepress cycle time, and reduce costs. It has been optimized for demanding production prepress workflows in offset, flexo, gravure, and digital printing.

Reliability = Predictability + Consistency

Adobe PDF Print Engine is the industry's leading rendering technology that maximizes the print potential of every press. It powers workflows in every industry segment, driving over 200,000 presses and proofers around the globe: offset, gravure, flexographic, inkjet, electrostatic and nanographic.

Customers who build their print jobs with Adobe applications such as Photoshop, Illustrator, InDesign, and Express benefit from consistent technology across the end-to-end job lifecycle. Using the same Adobe technology to create, manage, and print results in reliable reproduction. PDF Print Engine also excels at rendering jobs created in non-Adobe applications.

Typical Jobs

Graphically rich content produced with Adobe Creative Cloud and non-Adobe applications

Consumer packaged goods, grocery, electronics, pharmaceuticals, etc.

Customer correspondence, direct mail

Brochure

Annual reports

Publications and advertising

Books

CAD, GIS maps, blueprints

Signage

Manufacturing - direct to object

Apparel - direct to garment
