Dear Hiring Manager,

I am writing to apply for the Mechanical Engineer position at Kempes Technologies. I thoroughly enjoy managing my time and working on projects, both individually and in a team. I take pride in using my initiative when making decisions and believe that the position at Kempes Technologies will allow me to involve myself in various projects. I am excited by the scope of work and the opportunity to work alongside like-minded professionals engaging in the complex details of precision engineering.

In my previous role as a Mechanical Engineer at JS Labs, I worked extensively on designing parametric 3D models while communicating with clients. I expanded my knowledge of pressure calculations and analysis packages. In previous roles, I have worked as part of a larger team to verify the testing of new products and support the design and development department.

I hold a Master's degree in Mechanical Engineering Design and have over five years of experience in this field. I am proficient in the programming language Python and have experience working with a contract manufacturer. I have a strong knowledge of CAD software and the procedures used in drafting.

Thank you for taking the time to consider my application for the role of Mechanical Engineer. I look forward to hearing from you soon.

Yours Sincerely,

**Alex Smith**
